Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-8, 13, and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kitamoto et al.

Kitamoto et al teaches a passenger seating unit having a seat with a base frame and main frame and ancillary furniture. The seating unit is attached to the floor of an aircraft via tracks that are not parallel to the seating unit. The seating unit also has a sleeping unit. See figures.

Response to Arguments

In response to applicant's arguments that Kitamoto et al shows a seat longitudinal axis is parallel to the track, the Examiner respectfully disagrees. Kimatoto et al clearly shows that track is not parallel to the seat longitudinal axis. This can be see in figure 1. The track 10 is clearly curved. When one draws a seat longitudinal axis, this axis clearly intercept the curved track. The definition of parallel is "being an equal distance apart everywhere." Clearly Kitamoto et al does not teach that track is parallel to the seat longitudinal axis. The Examiner attaches figure 1 with a red line designating the seat longitudinal axis. The red line intersects the track 10. The applicant also cited that column 3, lines 65-67 and column 4, lines 2-8 as evidence that the seat longitudinal axis and the curved track are parallel. This is not convincing since the cited lines do

not mention anything definitive about the seat longitudinal axis and the curved track being parallel. Kitamoto et al discloses what has been claimed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
